

Please urge the FCC to reject NAB's petition 04-160. I am an XM satellite radio subscriber. I am also an OTR truck driver. I depend on XM's traffic and weather reports. I can touch a button and find out everything I need to know about current conditions in the areas to which I deliver. Without this I'd have to know which channel to tune into in whichever area I may be in at the moment; there are just too many channels, too many cities, for me to have that information at my fingertips -at a moments notice- when I need it...and, I DO need it. I love my XM. I had made my job much more bearable. I have a variety of things to listen to while I'm driving. PLEASE...don't mess with my XM. Thank you. Most respectfully yours, Ronna Denise Schultz
